APPRENTICESHIPS

SOFTWARE DEVELOPMENT

Your Career Starts Here

JUST IT

Making IT Happen

This is what you'll need:

In order to join the Apprenticeship scheme, you will need to be passionate about technology and coding along with the following criteria:

Minimum of 5 GCSE's (ideally A* - C) – Maths and English are essential

Good communication skills

Willingness to commit to up to an hours travel maximum

> **I get paid to create websites and apps**

Your Career Starts Here

Apprenticeships combine practical training in a job with study. As an Apprentice you'll be working alongside experienced staff, gaining job-specific skills, earning a wage and getting holiday pay along with studying towards a Software Development qualification.

If you love wrapping your mind around code and getting stuck into exciting projects then this is the pathway for you.

Whether you see yourself making it in a small start-up or large corporate company – we will have the right employer for you, and you will earn a real wage whilst you learn. An Apprenticeship will show you everything need to know about the industry with well-respected qualifications gained at the end of the programme.

Gain Leading Industry Qualifications and Essential Skills

If Web and Software Development is the industry you would like to break into then this Apprenticeship will fast-track your way there.

You'll build in-demand tech skills and master coding languages, whilst working for a top company in London. You'll spend 80% of your time getting hands on development experience with your employer, and 20% mastering new skills in your training sessions with Just IT.
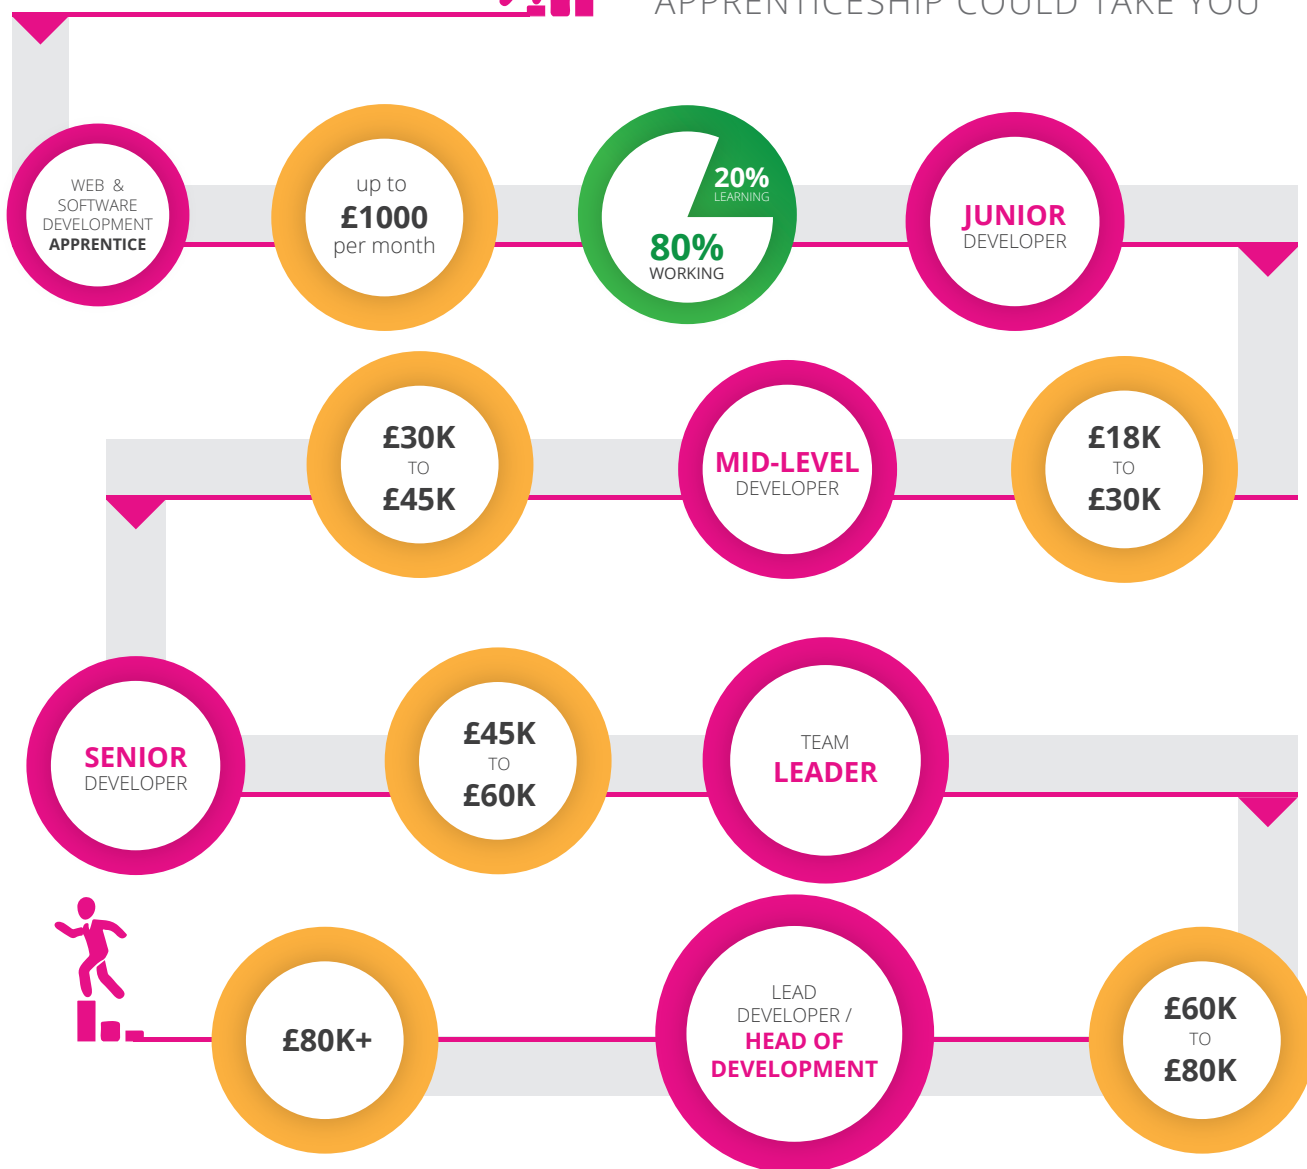

Software Development is needed by all employers; large and small. You could work in the financial world, legal, media production and many more.

£80K+

LEAD DEVELOPER / **HEAD OF DEVELOPMENT**

£60K TO **£80K**

Where Do You Want To Go?

Our unique Software Development programme lasts 12-24 months, and is available at both Level 3 and 4, but it's about where you would like to see yourself in the future that's really important to us. We can help you get there. After your Apprenticeship, you can progress from a Junior Developer on £18k - £30k to a potential Architect on £80k+. The IT industry is full of growing opportunities.

But don't just take our word for it – take a look at what some of our previous Apprentices thought of the programme...

> "I have been learning every step of the way. The experiences I got were crazy, I worked alongside Virgin Media and helped create designs for them. It has definitely given me the confidence to believe in my work."

Stefano Nicotra from Squawka

Squawka

> "I think it's great how much support you receive on the programme. University is nothing compared to real work experience. Technology is moving fast, and by the time of graduation, knowledge will most probably be outdated."

Kierrah from GB and Smith

GB&SMITH
Administration Intelligence

> "An Apprenticeship was the better option for me as it got my foot into the IT industry. I have a broad range of responsibilities now, and being able to use programming languages fluently is fantastic. It's fun, creative and I now see myself as a Project Manager."

Wayne Donaghy from TPG Design

TPG DESIGN

So what are you waiting for?
This is your opportunity. Grab it.
