

# Data Expert Programme Employer Case Study Hampshire County Council

The beauty of the Data Expert programme is that it does **sit alongside the work my staff perform every day.**

It has been a really good opportunity to **invest in members of staff** and as a manager, see how their skill sets develop within the role and shape the wider team.

From utilising the Data Expert programme, our department is now **evolving** and taking **advantage** of the new **technologies** that these data platforms are using.
