

Digital Transformation in Education

Just IT are a leading IT, data & digital apprenticeship provider who have been partnering with employers since 2001 and have supported over 12,000 tech careers, including those across education settings in the Hampshire area.

Staff members who use popular Management Information (MI) tools such as the below can benefit significantly from enrolling onto our data apprenticeship programmes. This includes data literacy enhancement, data driven decision making and provide opportunities for professional development.

Gain your qualification. You are now qualified

Case studies

“

“The recruitment process from Just IT was one of the easiest recruitment processes I've done in a school and I've been working in schools for 11 years because they did it all for us.”

”

Sarah Botwright @ Test Valley School

“

I would recommend an apprenticeship to anyone looking to dip their toes into IT. It's online so you don't have to attend an college, Just IT's business coaches are flexible and it has improved my IT skills and knowledge alongside how I can embedded new technology in my work place.

”

Steven Rice @ Forest Park School
